

**Abstract****Triazole derivatives useful in therapy**

- 5 The invention provides compounds of formula I,
- $$\text{R}^1\text{-OP(O)(OH)}_2 \quad \text{I}$$
- wherein R<sup>1</sup> represents the non-hydroxy portion of a triazole antifungal compound of the type comprising a tertiary hydroxy group; or a pharmaceutically acceptable salt thereof.
- 10 The compounds of the invention are useful in the treatment of fungal infections, and have good aqueous solubility.
